SOUTHERN STARS

Southern Stars Co., Ltd is a large-scale, professional producer of various types of stainless steel wedge wire. It is the first domestic company who has developed the special welding machine for wedge wire independently. The machine is based on the advanced foreign concept. We have already produced high quality flat wedge wire by ourselves successfully. We are a modern company who combines R&D, production and sales in one. We have a set of wedge wire machine, welding machine and welding mould. Because we use the advanced welding technology, the wedge wire becomes flatter, straighter and more beautiful, the application is also wider than before.

Since we established, we have adopted modern managing concept and firstly obtained the ISO9001 certificate in the wedge wire industry. We will always adhere to the "customer first, quality best" business value, and persisting the "technical innovation, quality improving, management implementing and efficiency working" business philosophy. Because of our classic products, good reputation, reasonable price and perfect after-sales service, we get strong support and affection from our customers. Southern Stars is willing to work with all domestic and overseas customers with the spirit of sincere cooperation and mutual benefit. You are highly welcomed to ask price or visit our company.
